

Need some fire mitigation work on your property? Downed and dead trees making your property difficult to use? Or a clearing made to start that house or for camping? My name is Mary Manka and I live on Dry Lake Rd. I've contacted Pine Brothers Tree Service (a local company) and am working on a group discount. For references, Jeff Togie used Pine Brothers Tree Service for his fire mitigation and was pleased with their service - see the 2022 Fall Newsletter. Pine Brothers did some fire mitigation work around my cabin last Fall, and I was pleased with their work. What I am attempting to arrange is for Pine Brothers to price for a group discount. How it will work:

1. Contact me and I will put you on the list of interested residents. The more the better as pricing will be a tiered billing. The more residents that can participate the less expensive the daily rate will be. They bill by day, you choose how many days you would like them working on your property.
2. You choose what service you would like performed and arrange with them. They cut, chip and stack. As example - for me I am trying to gather smaller trees and deadwood and making stacks. I will be having them clear larger dead trees, clearing a path wide enough for vehicles and chipping. I'm doing what work I can, and hiring them for the more difficult.
3. I am working with them on their pricing, it should be available within a week or two. You can call me for the firm price, but dependent on the numbers, daily rates could be approximately \$2000-2500/ per day. This may sound expensive, but remember the tax credit. And this is a discount of up to \$900/day. And they work hard.
4. Work will be completed this summer. Individual lot owners are completely responsible for all payments to Pine Brothers. This is NOT an Association expense and participation is completely voluntary.

Their website is www.pinebrotherstreeservices.com They are licensed and bonded.
